

Supplementary Table 1. Ct values of SARS-CoV-2 RT-PCR tests performed on the subject for the duration of the sampling period. RT-PCR was performed at least in triplicate for all time points except time point 2 (pink outline), for which the NP swab could not be retrospectively located. Median values on which Fig. 2 was based are also shown. (Ct = cycle threshold; RT-PCR = reverse transcription polymerase chain reaction; NP = nasopharyngeal.)
