

### Supplementary Figure 1 Total antibiotic consumption per facility pre- and post-intervention

Y-axis: average DDDs/100Rx per month for the last 6 months of the intervention.

X-axis: average DDDs/100Rx per month for the 6 months prior to the intervention.

The dotted line is the line of no change comparing pre- and post- intervention consumption.

Facilities below the dotted line indicate lower antibiotic consumption post-intervention compared to pre-intervention.
